ITEMS OF INTEREST

The matter of a covered curling and skating rink is being discussed by Claresholm citizens.

The drastic temporary injunction order as led by Attorney General H. M. Dougherty against shopcraft strike leaders in the States, was put in force on August 25th without any of its effectiveness being modified.

Thanksgiving Day this year will be November 6th. The date was fixed by parliament at the 1921 session, being designed to fall on the Monday of the week containing Armistice Day, which is November 11th.

Alex Thompson has been officially appointed magistrate for the High River district and enters upon his new duties at once. We congratulate the town on this appointment as Mr. Thompson is particularly well qualified to administer the duties of this office.

Mr. James Snell of Blackie district, met with a painful accident Saturday, September 23, while working around his threshing outfit he fell, breaking his ankle. He was attended by Dr. Burke and removed to the High River Municipal hospital and latest reports are that he is getting on as well as can be expected.

It is wonderful how quickly a fair grain crop in the west quickens the beat of the commercial and industrial pulse. For the first time in two years the car department at the Ogden C.P.R. shops at Calgary are working full time. At Edmonton the Canadian National Railway is spending a quarter of a million dollars in building the first unit of their western car shops.

The new United States tariff is now a law and is considered as prohibitive to Canadian produce marketers. The general opinions of the press in the States is about equally divided as to the wisdom and efficacy of the bill; some prominent papers of both the old parties, proclaiming that it will prove to be the undoing of the present administration and will be found to be a seriously harmful measure.

Our accounts are small, but we have a large number of them scattered all over the country for subscriptions. We presume that most of our readers intend to pay up at some time, but good intentions go short way towards paying our drafts and settling our bills. Most of those who are in arrears on subscriptions owe us for job work, know without being told how much more agreeable it would be on both sides if payment were made without putting us to the painful necessity of writing to each one personally. Now we respectfully ask each reader in arrears to send us a remittance at once.

FINE ATTRACTION

"Kissing Time," the attraction that will be seen at the Vulcan Opera House next Monday, October 9th, is a happy combination of mirth and melody, containing bright songs, witty dialogue and pretty dances. The presentation is well costumed and acted, being a musical revue with special vaudeville turns between acts, which makes a two-hour entertainment with not a single dull moment.

Joey Johnston, known as "the Scottish Laugh," is the featured member of the company, and his droll ways and funny sayings never fail to find favor with his audience. M. Courtier, another member of the company is, besides his other accomplishments, a sleight-of-hand artist of exceptional ability, in fact, his fellow magicians admit that he is beyond doubt, the master of them all. The various feats of skill he performs with cards and other articles are truly amazing and mystifying. May Robson, a girl with a most captivating personality, sings and dances her way into the heart of every audience, while Grace White and other members of the company are all finished artists in his or her line of business. The seat sale is now open at King's Drug Store.

POINTING A GUN

On Wednesday, the 27th instant, John Angus, a threshing hand working in the Champion district, laid a complaint before H. Cooper, J. P., against Charles Sutton, farmer, for pointing a rifle at the complainant contrary to Section 122 of the Criminal Code of Canada. The accused was arrested on a warrant issued by Justice Craig of Vulcan, and appeared before Justice Lindsay and Charters at Vulcan on Thursday evening, pleading not guilty. Evidence was given by the complainant and two witnesses that accused fetched the rifle from the house following a dispute as to the amount of wages due the complainant. Mr. L. N. Stack conducted the defence during which the accused and several witnesses swore that the gun was never pointed at Angus. Accused stated that the rifle was not loaded, but on being examined immediately after his arrest it was found to have four shells in the magazine. The accused was found guilty and fined twenty-five dollars and costs or in default thirty days imprisonment. The court ordered the gun to be destroyed.

The New York Giants have captured the National League flag for the second year in succession and will play the New York Yankees for the world's championship.

VULCAN DISTRICT SCHOOL FAIR

The Vulcan School Fair is a splendid demonstration of the result of town and country co-operation. Keen but friendly rivalry, promoted in a community spirit, has given to Vulcan the proud record of having one of the best—if not the best—school fairs in the Province.

It's all over but the shouting—the annual school fair—but, judging from the compliments from the visitors to Vulcan that day that are still coming in, the shouting will continue for many days to come. The 1922 event was an unqualified success. It was indeed a revelation, and the hundreds—and there were many hundreds—who viewed the twenty-seven hundred exhibits, all made by the boys and girls of the district schools, enjoyed a real delight and they will have pleasant memories that will linger long. We do not command adjectives sufficient to exaggerate the success of the fair. It was immense, and our judgment has general endorsement and the particular approval of the Provincial officials who have supervision of such affairs. It is another of the events which gives to Vulcan a record that makes the name known everywhere.

Thursday, September 28, is a date that has been long anticipated by the kiddies—yes, and all the rest of us. Publicity has been persistently given by The Advocate, and added to the careful and steady labor of the fair officials and school teachers, and the interest of pupils and parents, made a combination that could not fail of success. And just here let credit be given to the public spirited citizens who contributed prizes in cash and other forms, and we would not leave out the general public who gave support by their attendance, and almost everybody was there.

Bright and early in the morning, everything was a-ask, and the boys and girls from town and country were about after a sleepless night—great anticipation, and in this case realization was just as great for it was a great day, and none too long for the interesting program which did not permit of a minute from daylight to dark. Like the big circus, there was so much going on that you could hardly get it all. Just a few of the exhibits were added in the morning to the display that had required the labor of a large committee for hours the night before. And it truly was a fine display, a revelation of the talent of the students in their every line of work, from the raising and care of live stock to the fine art of painting and drawing. Can you imagine, there were 71 entries in carrots. There were over a hundred in other classes, and the number varied in the others which included grain and grasses, vegetables every manner of school work, cakes and candy and the product of domestic science. There was a real watermelon grown right here, cooking and canning by the girls, and the boys had milking stools, model houses and farm gates, and everything. Twenty-seven hundred articles, varied in kind and color, presented a display that made this fair a rival of a regular exhibition.

The boys and girls who do their work so well also know how to play, and gave evidence of this in the pep which they put into the athletic events, and there were twenty contests. It was an exciting hour or two, and the competitors were kept on the hop-skip-and-jump all the time, and the lines of spectators shouted and cheered their favorite in the race.

Noon time everybody went after the eats, and the picnic dinner idea proved to be good, and a healthy and happy crowd of children were just in fine shape for a feed. It was a great day for ice cream cones and fruit.

Then there was the oratory and singing contests and the spelling match, held in the opera house, which was crowded to capacity and there were as many more outside. There were several contestants in each event, and the efforts of the several competitors afforded splendid entertainment for those who could hear and see. Following the decision of the judges in these classes, Mayor Butchart presented the shields and other prizes to the winners.

The parade was the most spectacular number on the long and interesting program. The hundreds of kiddies, assembled in their respective school groups with their teachers, made the march the full length of the main street, and it was certainly an imposing spectacle, every boy and girl doing their best, for there were prizes for the school making the best appearance, and for the banners they carried. And they marched to the music by the Citizen's Band, the members of which cheerfully contributing their bit to the pleasure and success of the fair.

There was a great contest in the school yell. And say, didn't they yell. All were better than good, and the judges had difficulty in making the awards.

The physical drill competition was the last. There were several entries and every class presented an exhibition that made a fitting finale to a really great event—one that is an entire satisfaction to the promoters and the public, and a credit to a bunch of boys and girls that are hard to beat in all Alberta.

The list of prize winners will appear in correct and extended detail in future issues of The Advocate, and announcement will be made as soon as possible of the school winning the shield for grand aggregate of winnings.

LOCAL ITEMS

Henry Ford plans to turn out 6000 cars during 1923.

The C.P.R. summer hotels are all closed for the year.

Mr. John McRobbie and wife, of Blackie, were visitors in town this week.

The daughter of Hon. T. A. Cramer, aged 9 years died at her home on September 26, after a short illness.

Born, at the Vulcan maternity hospital, on October 2nd, 1922, to Mr. and Mrs. Brickenes, of Lomond, a daughter.

There have been two or three meetings of men in connection with the proposed flour mill for Vulcan, and the report is progress.

The C.P.R. monthly payroll at Lethbridge this month will reach the \$750,000 mark. With good crops and coal mining going on Lethbridge appears to be a very busy place.

A reward of \$5,000 is offered for the apprehension of the bank robbers who broke into the Union and Bank of Montreal recently in Foremost and other points.

The fall cometh and the long nights, and the curfew bell ringeth an hour earlier than in the summer months. The kiddies have to beat it now at 8:30.

The British mission, on their tour of Canada, will visit the Prince of Wales ranch on his request and will probably motor there from High River. The time for their visit has not as yet been set.

Some idea of the high grade of this year's wheat crop can be gained from the fact that out of 246 cars received at Winnipeg in one day 159 graded No. 1 Northern, 13 No. 2 Northern, and 8 No. 3 Northern.

Capt. White, and Capt. Douglass, of Calgary, came down for a couple of days shooting in the country with Dr. Hughes. They had great sport and splendid success, and we are glad of it, for we are indebted to the Dr. for a couple of nice birds.

The Department of Agriculture has decided that no special assistance will be given this year for live-stock and grain exhibitors, who wish to show at the forthcoming International Exposition in Chicago, or at the Royal Show in Toronto. This action has been taken in view of the need for economy.

Mrs. Clara H. McPherson, an official of the Rebekah Assembly of Alberta, will visit Clover Leaf Rebekah Lodge, Vulcan, at a special meeting on Saturday of next week. The distinguished visitor will be entertained by the local lodge and the visit will be an event of importance and interest.

At the Police Court, Vulcan, last week, a party who owned a motor cycle from which the license number plates were missing, pled guilty to the usual charge of infraction of the Motor Vehicle Act, but on his assurance that new license plates would be applied for was only fined the minimum fine and costs. This bears out our warning of last week as to the advisability of obtaining a license and number plates.

The road running west from the town out past the elevators, which has been opened and closed at different times, and which has been the subject of discussion from time to time, is to be opened again, this time permanently, the necessary by-law having been passed by Royal Council and other arrangements made. The action was taken in response to a large petition and a proposition presented by the many who are interested.

ONLY A YARN

A city business man was very keen on having proficient clerks in his employ. Before a clerk could enter his office he was required to pass a written examination on his knowledge of business.

At one examination one of the questions was: "Who formed the first company?"

A certain bright youth was a little puzzled at this, but was not to be fazed. He wrote: "Noah successfully floated a company while the rest of the world was in liquidation." He passed.

LOCAL ITEMS

Mr. W. C. Cameron, of Seattle, is at present in the district looking after his farming interests.

Mrs. Sheline, of Three Hills, is spending a couple of weeks in Vulcan, the guest of Mrs. Keiver.

Mr. John Massey, who is secretary of the High River exhibition, was a judge at the Vulcan school fair.

Mr. Philip Sorsky, optometrist, makes announcement of his next visit to Vulcan in our advertising columns.

Mr. and Mrs. Ernest Yates and family, of Gleichen, were the weekend guests of Mr. and Mrs. A. B. Sage.

There will be a sale of home cooking, under the auspices of the Girls' Club, at McIntosh's store, on Saturday, October 14.

Just as though to be in on it, the weather man precipitated a dandy rain on the middle day of "fire prevention" week.

Work has been commenced on the excavation for the basement of the proposed new church to be erected by the Anglican congregation.

Dominion Rebekah Lodge, Lethbridge, has extended an invitation to Vulcan lodge to make them a lodge visit, and the local members are contemplating the trip.

Pat Ryan has contracted the radio bug, and has had a receiving set in operation for a week or more before we found him out. He is having good success. This is some wireless centre.

Another sign of the passing of summer is the announcement of the commencement of the series of popular dollar dances, and by the time you have read this the first of these functions will be over.

"Slim" Morehouse, and his big team of twelve horses, have been several times photographed this week for The Advocate, and we hope soon to let the world see just how they haul grain to the elevators in Vulcan.

The last special prize to be received for the school fair was a Union Jack, donated by Mr. H. Galbraith, M.L.A., to be awarded to the school making the best appearance in the fair day parade. It is a dandy flag of good size, and would look good flying from any school, and every school should have one. It is a great thing to win one in this way.

Citizens promptly responded to the fire alarm on Wednesday last, the windiest day of a windy week, and it may be paradoxical, but when the men who hauled the apparatus to the scene of the fire they were entirely out of wind, all suggesting the advisability of procuring some more speedy and less laborious method of getting the implements to a fire. It was only a chimney blaze, thank goodness.

Reports on the opening game in the world's baseball series in New York were received here by wireless at the D. C. Jones drug store. Billy Reor, who has some talent and some ambitions along baseball lines, worked the plays on the board as the details came in distinctly. There was an interested and pleased audience of fans following the game, delighted that they were getting the next best thing to being in the stands with the thirty-five thousand in the big city.

Good for Vulcan. These things soon make us proud of ourselves. The following is to the Mayor from W. M. Seller, Provincial Fire Commissioner: "This department has received from our inspector, Mr. James Bruce, who recently inspected your town, his inspection report, and it is with a good deal of satisfaction that we find such favorable conditions from a fire prevention standpoint in the town of Vulcan. We take this opportunity of congratulating the local authorities on their excellent work in this connection."

The regular meeting of the Golden Rule Women's Institute was held at the home of Mrs. Hill. There was a good attendance and all were particularly interested in the cheese demonstration given by Mrs. Hill. Mr. H. Pearce was the fortunate winner of the quilt. Mrs. Leighton will be the hostess of the meeting on Thursday, October 5, the topic of the day being, "Education and Better Schools," by Mrs. G. E. Vaisey. All are cordially invited.

Public notice must be drawn to the excellent work of the secretary-treasurer of the school fair, Mr. R. L. Elves. The work of the president, Mr. E. G. McPherson is also worthy of special notice and that of the wide committee, but the secretary's work is in a class by itself. Nothing was apparently a trouble to him and many a difficulty he had to adjust. The result of his efforts is shown in the success of the fair. The experience he has gained will be of much service in the making of a prize list, and conducting of a school fair next year and an effort should be made now to get him to accept the position for next year for all difficulties are fresh in his mind and can be adjusted by him now in prospect for another fair, and we hope this suggestion will bring about the end desired.

THE VULCAN ADVOCATE

AN UNDESIRABLE

A bootlegger is a lawbreaker. He knows that and so does every intelligent person. The sympathizers and co-operators with bootleggers are also lawbreakers. The apologists for bootleggers and bootlegging are lawbreakers. If it is all right to gloss over the law breaking of the bootlegger there is just as much reason to treat bank robbers with the same kindly consideration. The bank robber knows he is practising an unlawful occupation and he realizes that when he is caught he faces the punishment of a criminal. So it should be with a bootlegger.

THE CRIME IN THE PASS

The killing of Provincial policeman Lawson at Coleman last week, followed by the quick arrest of the parties accused of the crime, has served to focus public attention on the work of the Alberta Provincial Police Force in connection with the lawlessness which centres around the crime of bootlegging. The details surrounding this case are such that they reflect honor on the A.P.P. as an organization, and upon the young officer who gave up his life, the victim of assassins who held a rather depraved viewpoint on the question of the enforcement of the Liquor Act. For a comparatively new organization, the Alberta Provincial Police is establishing a record which will compare favorably with that of any other similar police force. All Alberta's history is interwoven with the records of competent police service under which the province has developed and progressed with a high sense of appreciation for the observance of law and order. The Alberta Provincial Police is maintaining this splendid tradition, and the despicable crime of last week will awaken both pride and sympathy in this body's work. Alberta could not afford to have the impression go abroad that any lawless element in the province could carry on law-breaking with impunity and long survive retribution.

THE DEADLY CIGARET

If reports be true, the cigaret craze for girls is dying out. It is no longer fashionable, no longer smart. What a blessing! Beauty is not concerned with the moral or social aspect, but with the effects of cigaret smoking on beauty. There is probably nobody living who will undertake to prove that cigaret smoking is good for anybody, and there are thousands who are willing to wager that it is extremely harmful to the health. Aside from the facts that it discolors the teeth, stains the fingers, befools the breath, weakens the throat, injures the vocal cords, unsteadies the nerves, and undermines the health—any one of which facts makes it anti-beautiful—the one great danger is its insidious and aggressive attack upon the appetite. Like liquors and "dope," it creates a craving for more, until the habit becomes master and the victim a slave. Any girl who has acquired the craving for tobacco is to be pitied. Only those with an iron will can withstand its appeal, and to stop is torture. What good angel whispered into the ear of Dame Fashion that cigaret smoking is no longer the proper thing?

GRAIN GRADING HIGH

In a season like this, when the wheat yield in various portions of the province is not uniform, and when the prices for grains are not as high as the producers would wish, a measure of satisfaction can be found in the fact that the wheat is grading high this year. Since the beginning of the shipping season, the Canadian Pacific Railway reports up to September 20th, 10,151 carloads through Winnipeg, 73 per cent. of which graded No. 1 Northern or better, 35 cars grading Manitoba hard. The Canadian National Railways are moving forward through Winnipeg 1,000 cars of grain per day.

THE TURKISH QUESTION

The trouble in the Far East seems to be averted by giving in to the demands of the Turks, when Great Britain, France and Italy at a final session agreed to the Turkish claims to eastern Thrace, including the ancient capital of Adrianople. Kemalists must agree not to enter the present neutral zone, nor make any crossing elsewhere and must accept complete freedom of the Dardanelles, Sea of Marmora and the Bosphorus, preferably under the League of Nations. The Turks are also promised admission to the League of Nations and withdrawal of allied troops from Constantinople as soon as peace is effected. It is regarded as certain that Kemal will accept.

WEED SEED FOR SHEEP

Ten thousand sheep will be fed on screenings this year at Fort William and Westport by R. C. Harvey of Lethbridge, the well-known sheep rancher, who was in Winnipeg recently after completing arrangements for the care of his large flock. He fed seven thousand at this point last year and found what had been regarded as a drug on the market could be profitably turned into prime mutton. Of this lot four thousand were sold for shipment to New York and the remainder found a ready sale on the Toronto market.

HENRY FORGOT TO PAY TAX

If Henry Ford forgot about a deposit of \$2,000,000, in a Windsor, Ontario, bank as was reported several days ago, it is quite certain that he also neglected to make a tax return on the deposit, Alexander Black, assessment commissioner of Windsor, reasoned, as he started an investigation of the manufacturer's cash balances across the border. The commissioner figured Mr. Ford owed the city of Windsor about \$5,500 in taxes.

NEW A & G W TIME CARD

The Alberta and Great Waterways Railway company announces a change in time card effective on October 2nd. The trains on this railway will depart from and arrive at the Dunvegan yards instead of 121st street, Edmonton. Through trains leave Dunvegan yards on Mondays at 10:09 a.m. and the local train for Las La Biche leaves on Thursdays at 10:09 a.m. Taxicabs and busses connect with these trains from down-town points, leaving one hour earlier. There is sleeping and dining car service on the through trains.

ALBERTA EXHIBITS

The Department of Agriculture has decided that no special assistance will be given this year for live-stock and grain exhibitors, who wish to show at the forthcoming International Exposition in Chicago, or at the Royal Show in Toronto. This action has been taken in view of the need for economy.

Opening of Claresholm School of Agriculture

Classes Open October 31

Free Courses in Agriculture for Boys and Home Economics for Girls

Minimum Age 16

Special Course in Irrigation is provided at Claresholm School

Students from Gleichen and Youngstown districts transported free of charge to the Claresholm School.

Dormitory accommodation provided for Girls at Claresholm School, under supervision of matron and lady teachers, at about \$25.00 per month.

Accommodation for Boys may be secured at reasonable rates in respectable homes in Claresholm.

The Diploma courses cover a period of two terms of five months each. A student having matriculation standing or Grade XI may complete the two year course in one year. Successful students who obtain a certain standing are permitted to proceed to the University of Alberta where they may complete Degree Courses in three years in either Agriculture or Home Economics.

The Diploma course in Agriculture includes Animal Husbandry, Bacteriology, Botany, Chemistry, Civics, Dairying, English, Farm Management and Rural Economics, Field Husbandry, Horticulture, Irrigation, Mechanics, Mathematics, Physics, Poultry, Veterinary Science and Soils.

The Diploma course in Home Economics includes Bacteriology, Chemistry, Clothing and Design, Cooking, Dairying, Dietetics, English, Home Nursing, Horticulture, Household Administration, Hygiene, Mathematics, Physical Culture, Poultry and Sewing.

COMMENT

When in Toronto last year I was talking to an old wholesale man whom I have known for over twenty-five years. Incidentally I asked for his wife and a certain young lady I had known in my boyhood days, and he stated that they were in New York on a shopping trip. It struck me as funny that Toronto people should find it necessary to go to New York to shop, and I told him so. Oh, said he, it's funny but I was just thinking of that, and this is the way he expressed himself, "The people of the small surroundings towns often come to Toronto to shop; Toronto people go to New York to shop; New York people go to Paris and I was wondering where the Paris people went, and then I remembered that they were French and weren't such darn fools." People don't go away to save money. As any sane person knows, it's not the goods so much as it is the trip they are looking for. It sums up in just a bill of expense. It's real economy to buy at home. The necessity for certain goods is the excuse for the pleasure trip. Read the new local advertisements in this issue for inducements to remain at home and save money.

Bank bandits operating in North Dakota, killed the night policeman at Westhope.

"KISSING TIME"

Catch songs, dainty dances, clever dialogue and charming girls with brilliant costumes are the main ingredients of the attraction, "Kissing Time," which comes to the Vulcan Opera House on Monday, October 9. "Kissing Time" is a musical revue in three acts, containing several vaudeville specialties which are interspersed between the acts in such a manner that fills the two-hour performance chock full of good wholesome entertainment. The features member of the company is Joey Johnston, "The Scottish Laugh," and his funny make-up, queer characteristics and side-splitting comedy immediately make him a favorite with every audience.

M. Courtier is another artist whose work is of an exceptional calibre. He is a sleight-of-hand and legerdemain artist, and the feats he performs confound and amaze even the most sophisticated. Amy Robson, a most talented young lady, sings and dances and behaves in a manner that never fails to please. Grace White and other members of the cast are all exceptionally clever artists, and in their respective roles, decidedly merit the applause they invariably receive.—Seats now on sale at King's Drug Store.

RE SCHOOL BOARDS

It is probable that the next session of the legislature will have an opportunity to have a prolonged and extended debate on the possibilities of municipal school districts. This scheme would make one set of trustees responsible for the operation of all the schools in the municipal district; would make the administration a little more uniform and would work out a little more economically as well as more efficiently it is thought.

Under such a scheme it would be possible to have a secretary who would devote a good deal of his time to the work of the schools and also make it possible for the municipality to hire a supervisor who would visit all the schools and direct their operations and keep a close tab on the work done. On the other hand it would take the responsibility out of the hands of the individual school boards, who now direct the destinies of their districts.

WHAT GOVTS. SPEND

One of the most serious and legitimate complaints which the farmers and stockmen have against present conditions is that while the prices of their commodities are down—very thoroughly deflated—their buying power is very seriously impaired by the high cost of nearly everything they have to pay for.

Government is one thing we all have to pay for. It is costing very nearly double the money which it took in 1914 to administer the affairs of each province in Canada.

Interesting compilations have been made by the Canadian Bank of Commerce on this subject, and, now that the farmers are in control of the administration of four of our provinces there will be a chance to see if the "deflation" can be put in the cost of provincial administrations. So far it has not been done.

Alberta in 1914 had a population of 447,633, and the government spent that year \$5,401,595, which made the cost per head \$12.07.

In 1921, when our population was 688,454, the cost of running the affairs of the province had amounted to \$13,109,304, which brought the cost per head up to \$22.28, which is \$10.21 more than it was in 1914. During the present year the expenditure will be \$14,747,403, which will make the per capita expenditure a little higher.

Alberta is not held up as a "terrible example" by any means, for nearly every other province is in the same category, as the following comparative figures of per capita expenditure will show:

Province	1914	1921
P. E. Island	\$ 4.83	\$ 7.76
Nova Scotia	4.18	8.68
New Brunswick	4.12	8.69
Quebec	4.08	6.19
Ontario	4.46	9.71
Manitoba	10.09	16.49
Saskatchewan	9.21	16.04
Alberta	12.07	22.28
British Columbia	36.49	29.08

Not only are provincial budgets higher, but every money spending body from the federal government down to the smallest rural municipality is spending more money than it did in 1914.

Henry Ford plans to turn out 6000 cars during 1923.

SUMMERFALLOWING

The necessity of summerfallowing has been very forcibly brought to the notice of everyone interested in agriculture, especially in this true in southern Alberta within the past five years. This has been due to a gradual growth of conditions which have demonstrated that summerfallow and especially good summerfallow is becoming more necessary yearly. With each succeeding year, within this period, we have had it proved, times without number, that summerfallow we must, if we hope to crown our farming operation with success. It then only remains to be decided which of the many practices we will follow to give the land the preparation best suited to our climate and soil conditions.

As the climatic conditions vary, so too, does the use of summerfallow. Particularly in the southern part of the province moisture is the limiting factor in crop production, therefore, moisture conservation must, of necessity, be given primary consideration in all summerfallow treatments. It is also important that the maximum amount of moisture be retained and thorough weed control be carried out, and yet minimize the danger of soil drifting to the greatest possible degree. Disregarding any of these in summerfallow treatment will bring disastrous results.

The Clareholm School of Agriculture, in addition to its other experimental work, has undertaken this year to carry on a comparison of a number of suggested summerfallow methods and substitutes that may prove of value to the farmers of this district. These may be added to or discarded as the results indicate.

1. Plow 6 to 7 inches June; pack; seed sunflowers in double rows 3 to 5 rods apart in June, rows north and south, then use duck foot cultivator as required.

2. Plow 4 to 5 inches June; pack; list 3 feet apart; seed corn.

3. Plow 4 to 5 inches June; pack; seed oats for green feed, one-half in double rows and one-half in treble rows; rows 36 inches apart; use 2 bushels seed to the acre.

4. Plow 6 to 7 inches June; pack; cultivate part to be followed with duckfoot cultivator as required; crop one strip with oats using one-half bushel to the acre, and fallow one strip.

5. Summerfallow; plow 6 to 7 inches June; pack, then duckfoot cultivate as required to keep weeds down.

6. Repeat No. 1, and list in October every two rods running north and south.

7. Plow 6 to 7 inches June; pack; then disc as required to keep weeds down.

8. Do not plow; June double disc; then use duckfoot cultivator as required to keep weeds down.

9. Do not plow; June cultivate with duckfoot cultivator, two strokes, then harrow as required.

10. Do not plow; June cultivate with duckfoot cultivator two strokes, then use rod cultivator as required.

11. Do not plow; June cultivate with duckfoot cultivator as required throughout the season.

The land chosen for these experiments lies in the forty acre field east of the railway track. The eleven plots, consisting of one acre each and separated by roadways, lie in two ranges along east and west road. Previous to 1922 the whole plot area had received the same treatment, and after the various methods of summerfallow treatment are practiced this summer, it will be sown to wheat in the spring of 1923. The data concerning yield (etc.), will be taken in the fall and will be ready for publication at that time. A record of all the labor being kept and an estimate of the comparative cost of the various methods will be made.

The experiments divide themselves, naturally, into two classes: (a) summerfallow treatment, and (b) summerfallow substitutes. The first four fall into the second class and are designed to lessen the cost by eliminating the bare fallow and using a light crop, yet leaving the land in fair condition for the following year, the stubble being valuable in checking soil drifting as well as holding snow which will add to moisture content of the soil. The next seven are outlined to test the best cultural practices for southern Alberta. Some of these can be severely criticised in many respects; for example, numbers seven and nine on which the disc and harrow, respectively, are used to keep down weeds; but we feel sure the results obtained will be such as to demonstrate the value of proper implementation.

Silver Fox Farming

That the raising of fur bearing animals in captivity is to become an important industry in this country is a forgone conclusion. The activities of the Trappers owing to the ever increasing price of furs is sadly depleting the supply of wild animals. The only solution to the problem is raising them in captivity. Furs from Silver Foxes being extremely expensive induced Charles Dalton, a poor Prince-Edward Island farmer to start a small Ranch about fifteen years ago, today he is a millionaire. Others are making a remarkable success in the business. Our Ranch in Northern Alberta, although operating only one year, will pay about 150 per cent. profit. We will supply full information re building of pens and caring for animals. Write

Fox Rancher, Box 122, Vulcan.

Or Phone 33

ments of a less fining nature for summerfallow cultivation. These implements produce a mulch which will prevent evaporation to a great extent but they leave the soil so fine and reduce the soil fibre so rapidly that severe drifting is the result. The remaining five plots will give a good comparison of plowing vs. cultivation of the summerfallow.

The above experiments are being conducted in conjunction with other farm and experimental projects and are directly under the supervision of J. C. Hooper, Principal; G. B. Walker, Farm Manager; Hector McArthur, Agronomist.

THE DRUG TRAFFIC

"I want the W.C.T.U. to see that we have a drug act in Alberta, similar to that of Manitoba, and that some provision is made for the care of addicts before its next session, for if we don't strangle the drug ring, it is going to strangle us," stated Judge Emily Murphy, of Edmonton, in an address on "Law enforcement as it bears on the traffic in opium and drugs," at the Wednesday evening session of the tenth annual meeting of the Alberta W.C.T.U. in Wesley Methodist church. Mrs. Murphy said that the W.C.T.U. was the only organization which has shown any interest in the drug menace, which she believed to be threatening the very foundations of society.

"The people of Canada would be amazed if they knew the ramifications of the drug traffic in this Dominion," said the speaker, who has made an extensive study of the subject during the past six years. Her investigations have proved to her that it is purely an Anglo-Saxon menace, and that headquarters for the narcotic problems lies in western Canada. Vancouver leads all other cities, including San Francisco, Seattle and Los Angeles in the traffic of drugs. The traffic is no longer confined to cities but is pushing out to the rural districts.

One of the saddest things about this terrible menace is that the majority of addicts are under twenty-four years of age, and Mrs. Murphy pointed out that no home in Canada was safe. Dr. Royal Copeland, of New York, says that one third of the drug addicts in the world are in their teens. There are no old addicts, for they don't live long. The dread habit ruins the young people in their development. "You might just as well put them against the wall and shoot them," Mrs. Murphy declared.

With regards to reports, which Mrs. Murphy declares she hears everywhere, to the effect that the drug traffic is a result of prohibition, and that drugs are used as a substitute, for liquor, the speaker said that she has been unable to gather any data which would prove this. On the contrary, Mrs. Murphy said that the drug traffic has been a steady growth in this country, commencing years before prohibition. She pointed out that people who drink whisky, and drug addicts are a different class, for the effect of whisky is physical and sexual, while that of drugs is mental. Questionnaires sent out recently in the United States, showed that no connection exists between prohibition and the growth of the drug traffic. The fact that Montreal and Vancouver, the two cities in Canada, which have the most liquor, also have the most drugs, was also pointed out by the speaker. When people are deprived of liquor, they resort to home-brew and moonshine, she said.

The drug habit has a definite relation to crime for it is an expensive one, and addicts are forced to steal to get enough money to purchase the drugs. Statistics show that 80 per cent of addicts are criminals, and that crime in Canada has increased during the past year in spite of prohibition, due to drugs. Mrs. Murphy concluded with an appeal to the members of the union to go forward and deal with the terrible menace, which is threatening the Anglo-Saxon race. "If we do not take an interest in the traffic the work of the Social Service councils and organizations throughout the country will be destroyed," she declared.

REVENUE FROM LIQUOR

Sweden's income from liquor trade taxes during 1922 will be over 121,000,000 kronor, or more than \$32,000,000, according to the official reports just published by the Liquor Control Board.

One of the arguments used by Sweden's "wets" in recent prohibition referendum in Sweden, which resulted in a victory for the anti-prohibitionists, was that in case Sweden went dry there would be a heavy loss of revenue from liquor taxes, and that other commodities might have to be surtaxed to make up the deficit.

STRAWBERRY CROP

Fruit will eventually be a recognized irrigated land crop. That it can be made profitable on dry land is proven by the Prairie Nurseries at Estevan, Saskatchewan. We are told that "Farms Manager Wicklow kept a record of yield from a field of spring bearing strawberries of less than an acre in area, 130 square rods, to be exact. From June 27 to July 16 his crew picked 3,649 quarts which sold for \$1,094 and left a clear profit above all expenses of about \$600." \$600 profit from less than an acre would prove that fruit culture is a paying venture.

BRANT NEWS

Mrs. Charley Horsefield and little son are Brant visitors.

Mr. and Mrs. Ira Olsen were weekend visitors in Calgary.

Mr. and Mrs. Ben Holden spent the week-end with their girls in Calgary. Another great need of this country at present is more backbone and less sawbone.

The Bateman children returned to school today Monday after an absence of two weeks.

Several of the Brant young folks attended the dance given in Blackie Friday night.

Mr. Charles Malmberg of Herronton, Alta, was a Sunday guest at the St. Clair home.

Mrs. Bob Dingwall and children were Sunday visitors at the Will. Thomas home Sunday last.

Mr. Russel Thomas who is employed at the Malmberg ranch near Herronton, was visiting home folks Sunday.

Today, Monday, it is reported Mr. Jack Pettifer who is critically ill at the High River Municipal hospital, is very low.

Mrs. Hyman St. Clair and daughter Mabel and Louise were Saturday evening callers at the home of Mr. and Mrs. Betchel.

Lives-of speeders oft remind us we can break the limit, too, and departing leave behind us all that thought we had good sense.

Mr. Fred Thomas, a nephew of Mr. and Mrs. William Thomas of Manitoulin Island, Ont., is visiting the Thomas family at present.

Eight tents are pitched close to the stockyards. We understand it is a crew of irrigation surveyors, that are supposed to survey the Brant district for irrigation.

Threshing operations were at a standstill Friday afternoon and all day Saturday on account of the high wind that was blowing but today Monday, threshing is once again in full swing.

Services were held in the Catholic church Sunday morning. First Holy communion was taken by the following little girls, Hildagarde and Mildred Heckle, Mary Phillips, also a number of boys and girls from Blackie and Ensign.

Mr. Oscar Johnson seems to have had luck in having his grain teams run away Monday, while one of his men was on his way home he was reading the newspaper when his team took fright and ran away, no one was hurt and no damage done.

BERRYWATER NEWS

A meeting was held Wednesday, November 20 at the home of Mrs. Edward O'Neil. Although this is the busy threshing season, over a dozen ladies found a way to attend. This meeting was given over to discussion of resolutions which the local wished to send in to the annual convention as these have to be presented at the district convention which meets at Basano, October 13. The delegate for this convention will be appointed at the next meeting which is at the home of Mrs. Lew Douglas, October 11. A paper will be given by Mrs. Alex McIntyre on "Curing Meat for Summer Use", also a demonstration on "Home-Made Vinegar" by Mrs. Carr.

RED CROSS NEWS

Mr. G. L. Johnson who has been looking after his interests in this district left on Sunday for his ranch at Elkton.

Mr. and Mrs. Harlan Thompson and daughter Charlotte, passed through here last Sunday en route to their home in Spring Coulee.

Rev. Mr. Brunton of Vulcan preached at Red Cross on the 24th ult., and will hold service every two weeks until roads become impassable.

The wind was blowing a perfect gale, even the threshing machine ceased, but the Vulcan ladies proved equal to the occasion showing they are no "quitters".

Mr. Roy, who had been a great sufferer for some time passed away on Sept. 21, and was buried in the Vulcan cemetery. Mr. Roy leaves a wife and daughter Florida, and son Fred, for whom much sympathy is expressed.

Red Cross people are finally satisfied with the board's selection of a teacher. And school opened the 18th ult. That they are hard to please is proven by the fact that the long-suffering secretary had to wire to New Brunswick for Miss Ruth Pickard who comes very highly recommended.

The Vulcan Women's Institute turned out en masse on the 20 ult. to pay the long-deferred visit to the Redlandview Institute, which met at the fine home of Mrs. Ben Graham.

The roll-call was answered by some household hints, and a song very sweetly sung by the Redlandview president Mrs. H. C. Doane. After which business was dealt with. Then there were brief addresses of welcome by Mrs. Doane and reply by Mrs. Simington. And a reading splendidly rendered by Mrs. Clayton. Then a very carefully prepared paper on "Canadian Authors" was read by Mrs. Ed. Lane which was listened to with great interest by all the ladies. A social hour was enjoyed along with the lunch, and the Vulcan Institute left for home singing "They are jolly good fellows" and all felt that it had been a profitable and happy afternoon.

The Bank of Canada

YOU GET THE AMOUNT OF THAT CHEQUE.

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experience on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editorial staff consists of men thoroughly familiar with every branch of farming both from the practical and theoretical standpoint. Every month the magazine publishes experiences sent in by readers. Many of these are short cut findings that are real money savers to farmers.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly, then why not take advantage now. Your subscription to this weekly together with a year's subscription to the CANADIAN POWER FARMER for the same price as this weekly alone. This is where you get the \$1.50.

Mail your cheque or drop into our office the first time you are in town.

GET YOURS TO-DAY

LINE GIVING YOU A CHEQUE FOR \$1.50

TREE PLANTING

Every experienced feeder knows, and every farmer should know, that stock will not thrive or lay on flesh when constantly exposed to the winter winds of our western prairies. On the other hand, it is well established that if afforded adequate protection from the winds, live stock can be profitably fed to a finish in the open, even in our coldest winter weather.

I am quite aware that this statement may be questioned by persons lacking actual experience, but definite proof of its truth is fortunately available from many different sources. Reference may be made to the work in this line carried on at the Brandon Experimental Farm (especially during the superintendency of Mr. James Murray, now district representative at Medicine Hat for the Alberta Department).

In a series of experiments made at the Lacombe Experimental Farm to determine the time required to mature various grains, it was shown that in 1916 it required 159 days to mature Marquis wheat, 155 days to mature Banner oats, and 140 days to mature O.A.C. barley, calculating the time from the date of seeding to the date of harvesting. In 1917 Marquis wheat required 119 days, Banner oats and O.A.C. barley 98 days. In 1918 Marquis wheat required 136 days, Banner oats 120 days, and O.A.C. barley 121 days. In 1919 Marquis wheat required 129 days, Banner oats 120 days, and O.A.C. barley 113 days.

From these figures it would appear that climatic conditions have a great deal to do with crop production in Alberta.

Two tons of tomatoes, grown on his irrigated farm six miles from Coal-dale, is the achievement of "Dad" Lathrop. Part of this enormous produce will find its way to the Lethbridge market.

CROP REPORT

Alberta has had a couple of weeks of ideal threshing weather. Up to the end of September, no damaging frosts are reported from any portion of the province. Medicine Hat reports 80% of threshing completed, Lethbridge 60%, Youngstown 95%, Athabasca and Peace River Country, threshing well under way. The yields reported are variable as regards the whole province. This is also true of many different sections where good yields go alongside light yields, the higher yields being largely attributable to summer-fallowing and good farming. Threshing in turning in records for small communities also show variable yields. The best grain crops are reported in the south and south-western portions of the province. Very good yields are reported in the Cardston, Pincher Creek, Lethbridge, Clara-holm, Vulcan and Taber districts. The Medicine Hat, Lomond and Redcliff districts report light yields. Points against 30 bushels and barley 20 bush-light crops; also points in the eastern part of the central portion of the province. In the Gleichen-Bassano districts, on non-irrigated lands, the yields have been fair, but lower than expected. East of Edmonton, on the C.N.R. the wheat is running from 10 to 15 bushels on stubble and 20 to 30 bushels on summer-fallow; oats averaging 30 bushels and barley 20 bushels. In the Athabasca country, wheat will average 20 bushels, oats 40 and barley 25 bushels. In the Peace River country, the crop as a whole is lighter than usual, with odd points showing very fine yields.

The bulk of the south crop is grading No. 1 Northern. On the Goose Lake line 75% of the grain is grading No. 1 Northern. Wheat on the main line of the C.N.R. east of Edmonton, is grading No. 1 and No. 2 Northern.

Forest fires did a lot of damage recently near Melch, B.C.

The average yields of wheat on all plots on the Raymond experimental farm averaged 73 bushels of Marquis wheat per acre, while one plot aver-

Railway News

Port Couillard, B.C.—On July 29 the city treasurer received \$16,000, the C. P. R. taxes, which were not really payable until August 31. There is jubilation in the City Hall for these taxes are the first paid since the expiry of the by-law fixing the flat rate.

St. John, N.B.—All the C. P. R. employees now living who served in the recent war will have a token to commemorate their sacrifice in the shape of a scroll which is a fine piece of work and is almost a copy of the large bronze tablet unveiled by the C. P. R. here on April 28, 1922. The scroll is signed by E. W. Beatty, President C. P. R., and E. Alexander, Secretary. The inscription on the scroll reads: "In honor of duty nobly done. This scroll serves to commemorate that, while in the service of the Canadian Pacific Railway (the recipient's name appears here), relinquished his position in response to the call of King and country and served during the Great War 1914-1918."

The base of the scroll is set off by the names of the following battles: Ypres, Festubert, the Somme, Vimy, Hill 70, Passchendaele, Amiens, Cambrai, Drocourt-Queant and Mons.

Regina.—The Saskatchewan better farming train brought its highly successful tour to a conclusion recently, and Mr. Williams, agricultural agent of the Canadian Pacific Railway Company, expressed his belief that the trip, the biggest yet operated, with the biggest attendance, also got bigger and better result than any of its predecessors. "Many silos," said Professor Winters, of the Animal Husbandry Department of the College of Agriculture, who was on the train through the whole trip, "will be built as a result of the visit of the better farming train."

Professor Potts, who was lecturing on dairying and who was in charge of the dairy exhibit car, stated that in the southern and eastern parts of the province there is a very noticeable increase in the interest taken in cow testing work, and one result of the tour of the train, he was convinced, will be that a very large number of dairymen will now adopt this method and many others, formerly doubters, are now convinced of the value of this system.

Lubrication, ignition and carburetor troubles were the chief matters upon which farmers sought the assistance of Mr. Josephson in the far-mechanics car, and he believed that an unprecedented number of power users benefitted by bringing their problems for solution to the better farming train.

Both the household science and the forestry sections were very busy throughout the trip. In the field husbandry car Miss Brayford's bees attracted considerable attention. This lady has kept bees for many years near Wawota, and last year her output of honey reached well over 900 pounds.

J. K. Finlayson, who was in charge of the poultry car the greater part of the trip, states there seems to be a good deal of doubt regarding the cotton-fronted poultry house, some complaining that the birds froze their combs. This, he said, was because the house was overcrowded, and the more hens there are the more moisture comes from the condensing breath. A hen's temperature is 106, and she can stand the cold perfectly well, as long as the air is dry. The cotton-fronted poultry house, with insulated walls and properly ventilated, has been found absolutely satisfactory at the College of Agriculture.

The total attendance for the tour was 32,881, and surpassed the former best on record by 107. The difference between this year and last year would have been many more had it not been for the fact that heavy rain spoiled the last day's attendance, when three meetings were scheduled. The average daily attendance was 1,061, and the total attendance was comprised of 8,275 men; 6,332 women; 19,971 boys and girls; and 2,803 babies.

The French wheat crop is one fourth short in this year's production.

Two Saskatchewan Banks were looted on Wednesday evening. The Union Bank branch of Moosomin where \$8,000 in cash was secured and the Bank of Montreal where \$6,500 was taken. No arrests have so far been made. It's becoming easy to get money from banks of late. This no doubt, because of the prospective good crop reports.

THE FROST PERIOD

Two weeks ago an article was sent out to Alberta newspapers showing the "Frost Free Periods" in the province. To supplement this we wish to give Alberta people an idea of the periods which are free from dangerous frosts. To this end the publicity and statistical branch of the Department of Agriculture has compiled from the Dominion Meteorological Records a table showing the "Six Degree Period", taking into consideration the date of the last 60 frost in the spring and the first 60 frost in the fall, and covering dates from the formation of the province to the end of 1921. The figures quoted hereunder cover the period from 1916 to 1921—six years—and farmers who are interested in a subject of this kind should cut out these figures and put them away for reference.

Medicine Hat—Average over six years, 173 days; longest period 200 days in 1921; shortest period 154 days in 1916; April 9, 1919, and October 22, 1918, are the extreme dates.

Calgary—Average over six years, 151 days; longest period 166 days in 1917; shortest 136 days in 1921; May 4, 1919 and October 22, 1918, are the extreme dates.

Edmonton—Average over six years, 147 days; longest period 164 days in 1921; shortest period 119 days in 1917; April 24, 1916 and October 9, 1918, are the extreme dates.

Vermilion—Six years average, 123 days; longest period 136 days in 1918; shortest period 110 days in 1920; May 17, 1918, and September 30, 1921 are the extreme dates.

Peace River—Six years average, 119 days; longest period 153 days in 1921; shortest period 115 days in 1916; April 7, 1921, and September 30, 1917 are the extreme dates.

FIRE PREVENTION

On Monday last Fire Prevention week commenced throughout Canada and it should be observed equally in this place as in other cities; towns and villages of the Dominion.

The call to the citizens to do their best for the minimizing of dangers from fires is a national one, and, considering what fire losses mean to the resources of the Dominion, a patriotic one. This can be estimated in the fact that the total fire loss in Canada during 1921 was forty-five million dollars. The co-operation of the individual in minimizing fire losses becomes a personal one when it is said that the insurance companies had to stand a large share of this loss. Naturally they collected the largest premiums from the lines of business that were causing most of the loss. Eighty per cent. of Canada's fire waste in 1921 was due to a few of the larger manufacturing plants. As the literature in the propaganda for the observance of fire protection week says, "you helped make good this loss. You also helped pay the insurance company's expenses. Altogether the people of Canada paid into the coffers of the company over \$50,000,000 in hard earned coin."

What the people of this town are asked to do during this week is to

You are entitled to a real battery — one that gives uninterrupted service and lasts a long time. You will find the Exide even more than a comfort, for its long life makes it a real economy.

NOTICE

To Creditors and Claimants

In the Estate of Alfred Theodore Laclair, late of Calgary, Alberta, Farmer, deceased.

Notice is hereby given, that all persons having claims on the Estate of the said Alfred Theodore Laclair, who died on the 32nd May, 1922, are hereby required to file with the undersigned Administratrix of his Estate at the offices of her solicitors undermentioned, by the 2nd November, 1922, a full statement duly verified of their claims and of any securities held by them and that after that date the Administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to her attention. Dated this 26th day of September, 1922.

ELLA L. LACLAIR,

Administratrix.

Wright & Wright, Solicitors,
Alberta Block, Calgary.

clean out their cellars and closets by getting rid of anything which may cause internal combustion or encourage the starting of fires. In the matter of spontaneous combustion the following are very apt to produce it: oil, paper, waste, benzine, rubbish, oily rags, paint materials. There is again the thoughtless handling of matches, gas fires, cigarettes, chemicals, electricity, pipe ashes, cigar stumps.

There is no reason why there should be a backyard full of broken bits of wooden boxes to serve as adjuncts for spreading the flames when a fire starts. A basement full of old papers, bat boxes, and ashes is an open invitation for a fire. So also is an attic full of broken chairs, sofa stuffing, and old rubbish such as carpet strips, etc.

To take every precaution against fires and for people to educate themselves against allowing any inflammable matter to lie around is the object of the fire prevention week. The week is a clean-up week in a sense, in which citizens, both for fire protection and for hygiene, are called on for a general ransacking of cellar and closet and the ridding of house and backyard from all that will cause or provoke fires.
